

Beetle surprisal predictivity by training-token budget and curriculum, across MECO reader L1s
(trend lines drawn only where $n \geq 3$ models per cell)

Mean $\beta(\text{surprisal})$ per-subject
random slope ($\uparrow$ stronger sensitivity)

Dutch readers (NLD)

German readers (DEU)

Chinese readers (ZHO)

- Curriculum
- B1 balanced
 - B2 simultaneous
 - B3 sequential 33/67
 - B4 classroom 20%
 - B5 late L2
